Geometric to showcase DFMPPro 3.0 at PlanetPTC Live 2011

Motorola Solutions to present its experience with DFMPPro at the event

Mumbai, India, May 17, 2011: [Geometric Limited](#) (BSE: 532312, NSE: GEOMETRIC), a leader in Product Lifecycle Management (PLM), Global Engineering Services, and Offshore Product Development (OPD) solutions and technologies, will showcase its easy to use manufacturability automation software [DFMPPro](#) for Creo Elements/Pro® 3.0 at Booth #510, at PlanetPTC Live, from 12-15 June, 2011 at the Caesars Palace Las Vegas Hotel, Las Vegas, Nevada, USA.

Geometric will provide product demos at the booth throughout the event. In addition, Mr. Paul Lalinde from Motorola Solutions will also be presenting on the topic of 'Automating Manufacturability checks with DFMPPro' during the partner track session at 11:00 AM on June 14, 2011 in the Octavius 20 room. Mr. Lalinde will share his experiences on the various challenges faced by Motorola Solutions in the area of DFM, the measures he took to address some of those problems, and how DFMPPro helped automate the process.

At the event, Geometric will demonstrate methods of performing automated manufacturability checks using DFMPPro for various processes like injection molding, sheet metal, machining (milling, turning, drilling). The newly added assembly checks module will save a lot of time for design engineers where clearance between individual, as well as, set of components can be checked automatically, thus reducing the checking time from days to minutes.

Visitors will also have an opportunity to participate in a unique design contest at our booth.

For more information about the product, please visit us at www.dfmppro.com

About DFMPPro:

DFMPPro automates manufacturability checks, which helps design and manufacturing engineers validate the design quickly. It assists identification of design areas that are difficult, expensive or impossible to manufacture, assemble and service. It works on principle of 'Right First Time' by validating manufacturability guidelines right at the design stage. These guidelines can be easily configured as per organizational requirements in form of rules. It also facilitates a collaborative design environment by generating reports, which are compact and easy to share.

About Geometric:

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 6.21 billion (US Dollars 136.47 million) for the year ended March 2011. It employs over 3900 people across 10 global delivery locations in the US, Romania, India, and China. Geometric was assessed as CMMI 1.1 Level 5 for its software services and is ISO 9001:2008 certified for engineering operations. The company's operations are also ISO 27001:2005 certified.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPPro, GeomCaliper® and 3DPaintBrush™. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
